ESCO Reviews

The ESDIS Standards Coordination Office (ESCO) conducts reviews of proposed standards, practices, and technical information relevant to the ESDIS mission. Documents are reviewed as part of the ESDIS Project's standards process. Approved documents are published and listed on the Standards Requirements and References page.

Current information on reviews can be found on the ESCO Reviews page on NASA's Earthdata site.

Upcoming Reviews - these RFCs have been submitted to ESCO but are not yet ready for community review
