How to configure Hipchat

Testing of HipChat in SIT environment (add user to ursMemberGroup)

Step-by-step guide

1. Download the latest Atlassian HipChat client https://www.hipchat.com/downloads and configure a new account
2. When you launch HipChat client, you'll see a login dialog. That's for the cloud-hosted service. You'll want to add a new local server in HipChat Preferences (select Preferences menu item on menu bar)

No Accounts
ADD AN ACCOUNT
Apparently, you've removed all your HipChat accounts.
You'll need to add an account to get back to work.
