

ESO Standards Forum

This is a discussion area about data systems standards, conventions, and best practices relevant to the Earth Observing System Data and Information System (EOSDIS). This includes formal standards such as those produced by the Open Geospatial Consortium (OGC) as well as informal standards that have been developed elsewhere or within EOSDIS.

You are invited to use this forum to ask questions, submit comments, discuss trade-offs, and track the status of ESO approved standards as well as to make suggestions for new standards to be considered for inclusion into the approved standards list.

Directions for using this forum

To join the discussion on an existing topic: click on the topic and then enter your text in the "Write a Comment" box.

To add a new topic, first look to see if there's an existing topic that would be appropriate to comment on, otherwise click [here](#) (or on the link near the top of the topics list) to request a new topic. A moderator will act on your request.

If you feel a topic /comment needs to be removed, please notify User Services at support@earthdata.nasa.gov.

We also welcome feedback and suggestions.
