Element Description

The Tiling Identification System element defines a named two-dimensional tiling system related to the collection.

Best Practices

A tiling identification system is a defined 2-D grid which covers the surface of the Earth. An example of a tiling identification system is the [Worldwide Reference System \(WRS\)](#) where the surface of the Earth is split into numbered paths and rows. The WRS-2 system is used to catalog Landsat data and is a popular way to search for Landsat data. Another example are the various [MODIS grids](#), such as the MODIS Sinusoidal Tile Grid system which divides the Earth into 595 10 x 10 degree tiles.

There are five sub-elements used to specify a tiling identification system. If provided, all of the sub-fields are required:

Tiling Identification System Name: This field identifies the name of the tiling identification system. The name must be selected from a controlled enumeration list which includes the following values: CALIPSO, MISR, MODIS Tile EASE, MODIS Tile SIN, WELD Alaska Tile, WELD CONUS Tile, WRS-1, WRS-2, Military Grid Reference System

Coordinate 1/ Minimum Value: Identifies the minimum value for one dimension (e.g. horizontal) of the two dimensional tiling system.

Coordinate 1/ Maximum Value: Identifies the maximum value for one dimension (e.g. horizontal) of the two dimensional tiling system.

Coordinate 2/ Minimum Value: Identifies the minimum value for the other dimension (e.g. vertical) of the two dimensional tiling system.

Coordinate 2/ Maximum Value: Identifies the maximum value for the other dimension (e.g. vertical) of the two dimensional tiling system.

Examples:

TilingIdentificationSystemName: MISR

Coordinate1/MinimumValue: 1

Coordinate2/MaximumValue: 233

Coordinate2/MinimumValue: 1

Coordinate2/MaximumValue: 80

TilingIdentificationSystemName: MODIS Tile SIN

Coordinate1/MinimumValue: 0

Coordinate2/MaximumValue: 35

Coordinate2/MinimumValue: 0

Coordinate2/MaximumValue: 17

Element Specification

Providing a Tiling Identification System is optional. An unlimited amount of Tiling Identification Systems may be provided (Cardinality: 0..*)

Model	Element	Type	Usable Valid Values	Constraints	Required?	Cardinality	Notes
UMM-C	TilingIdentificationSystem/TilingIdentificationSystemName	Enumeration	CALIPSO MISR MODIS Tile EASE MODIS Tile SIN WELD Alaska Tile WELD CONUS Tile WRS-1 WRS-2 Military Grid Reference System	n/a	Yes, if applicable	1	Location of the TilingIdentificationSystemNameEnum in the UMM version 1.17.2 schema: https://git.earthdata.nasa.gov/projects/EMFD/repos/unified-metadata-model/browse/collection/v1.17.2/umm-c-json-schema.json
UMM-C	TilingIdentificationSystem/Coordinate1/MinimumValue	String	n/a	n/a	Yes, if applicable	1	
UMM-C	TilingIdentificationSystem/Coordinate1/MaximumValue	String	n/a	n/a	Yes, if applicable	1	
UMM-C	TilingIdentificationSystem/Coordinate2/MinimumValue	String	n/a	n/a	Yes, if applicable	1	
UMM-C	TilingIdentificationSystem/Coordinate2/MaximumValue	String	n/a	n/a	Yes, if applicable	1	

Metadata Validation and QA/QC

All metadata entering the CMR goes through the below process to ensure metadata quality requirements are met. All records undergo CMR validation before entering the system. The process of QA/QC is slightly different for NASA and non-NASA data providers. Non-NASA providers include interagency and international data providers and are referred to as the International Directory Network (IDN).

Please see the expandable sections below for flowchart details.

- Manual Review
 - Check that the purpose description is appropriate for the dataset.
- Automated Review
 - Check that the field has been populated.
 - Check that the field length is not greater than 1000 characters.

TBD

[ARC Priority Matrix](#)

Priority Categorization	Justification
-------------------------	---------------

Red = High Priority Finding	This element is categorized as highest priority when: - The Tiling Identification System Name does not match an enumeration value (CALIPSO, MISR, MODIS Tile EASE, MODIS Tile SIN, WELD Alaska Tile, WELD CONUS Tile, WRS-1, WRS-2). - The Tiling Identification System provided is incorrect for the dataset.
Yellow = Medium Priority Finding	This element is categorized as medium priority when: The Tiling Identification System Name does not match an enumeration value when the metadata format is anything other than UMM-JSON (this field is not controlled in other metadata dialects).
Blue = Low Priority Finding	This element is categorized as low priority when: A recommendation is made to add a tiling identification system to the metadata when appropriate.
Green = No Findings/Issues	The element is provided, and follows all applicable criteria specified in the best practices section above.

ARC Automated Checks

ARC uses the [pyQuARC library](#) for automated metadata checks. Please see the [pyQuARC GitHub](#) for more information.

Dialect Mappings

DIF 9 (Note: DIF-9 is being phased out and will no longer be supported after 2018)

DIF 10

Providing a `TwoD_Coordinate_System` is optional. An unlimited amount of `TwoD_Coordinate_Systems` may be provided (Cardinality: 0..*)

UMM-C Element	DIF 10 Path	Type	Constraints	Required in DIF 10?	Cardinality
TilingIdentificationSystem /TilingIdentificationSystemName	Spatial_Coverage/Spatial_Info/TwoD_Coordinate_System /TwoD_Coordinate_System_Name	String		Yes, if applicable	1
TilingIdentificationSystem/Coordinate1 /MinimumValue	Spatial_Coverage/Spatial_Info/TwoD_Coordinate_System /Coordinate1/Minimum_Value	Decimal		Yes, if applicable	1
TilingIdentificationSystem/Coordinate1 /MaximumValue	Spatial_Coverage/Spatial_Info/TwoD_Coordinate_System /Coordinate1/Maximum_Value	Decimal		Yes, if applicable	1
TilingIdentificationSystem/Coordinate2 /MinimumValue	Spatial_Coverage/Spatial_Info/TwoD_Coordinate_System /Coordinate2/Minimum_Value	Decimal		Yes, if applicable	1
TilingIdentificationSystem/Coordinate2 /MaximumValue	Spatial_Coverage/Spatial_Info/TwoD_Coordinate_System /Coordinate2/Maximum_Value	Decimal		Yes, if applicable	1

History

UMM Versioning

Version	Date	What Changed
1.17.2	1/18 /2023	Changed the TilingIdentificationSystems/Coordinate1 and Coordinate2 to be type of string instead of number so that military grid reference system grids can be entered. They use alpha-numeric coordinates.
1.16 - 1.17.1	3/24 /2021 through 8/10 /2022	No changes were made for Tiling Identification System during the transition from version 1.16 to 1.17.1
1.15.5	12/3 /2020	No changes were made for Tiling Identification System during the transition from version 1.15.4 to 1.15.5
1.15.4	9/18 /2020	An additional enum, 'Military Grid Reference System' was added to the Tiling Identification System Name
1.15.3	7/1 /2020	No changes were made for Tiling Identification System during the transition from version 1.15.2 to 1.15.3
1.15.2	5/20 /2020	No changes were made for Tiling Identification System during the transition from version 1.15.1 to 1.15.2
1.15.1	3/25 /2020	No changes were made for Tiling Identification System during the transition from version 1.15.0 to 1.15.1
1.15.0	2/26 /2020	No changes were made for Tiling Identification System during the transition from version 1.14.0 to 1.15.0
1.14.0	10/21 /2019	No changes were made for Tiling Identification System during the transition from version 1.13.0 to 1.14.0
1.13.0	04/11 /2019	No changes were made for Tiling Identification System during the transition from version 1.12.0 to 1.13.0
1.12.0	01/22 /2019	No changes were made for Tiling Identification System during the transition from version 1.11.0 to 1.12.0
1.11.0	11/28 /2018	No changes were made for Tiling Identification System during the transition from version 1.10.0 to 1.11.0
1.10.0	05/02 /2018	During the transition from version 1.9.0 to 1.10.0, an enumeration list was created for Tiling Identification System. Values in the enumeration include: CALIPSO, MISR, MODIS Tile EASE, MODIS Tile SIN, WELD Alaska Tile, WELD CONUS Tile, WRS-1, WRS-2
