NASA ISO Geospatial Metadata Forum

Forum Overview

At the moment, this forum is an open and general forum. It is anticipated that additional sub-forums will be added to cover specific issues.

The forum functions in the following way:

1. **To Create a New Topic:** Click "Add Topic" to add a topic. This is the same as creating a child page to this page.
2. **To Join the Discussion on a Topic:** click an existing topic and then, at the bottom of that page, click the **Write a Comment** link.
    a. It is encouraged to label all pages.
    b. If you feel a topic/comment warrants being made a sticky or needs to be removed, please notify the admin.
3. **Search for Information:** The entire forum may be searched from the box at the bottom of the page.

Unknown macro: 'rest-forum'

Topic pages initially appear as normal, new Confluence pages and might not appear in the same fashion as posts do in traditional, commercial forums. We are, however, designing a template to address this issue.
