

Earthdata Search 19.4 Planning

The following UI/UX improvements are being considered for work during the upcoming program increment for Earthdata Search. Please use the table below to vote upon your DAAC's preference for what gets worked first. Once all votes are in, we will use the information to help inform prioritization discussions. You may vote multiple times if you wish. Each item as an accompanying wiki page that provides some context for each effort.

Unknown macro: 'multivote'

Don't see something you were hoping for? Please add a comment to the page if there's a feature you were hoping for that is not on this list.
