Earthdata Search Page Load Time Metrics

Page load times for Earthdata Search PROD were assessed using the following websites:
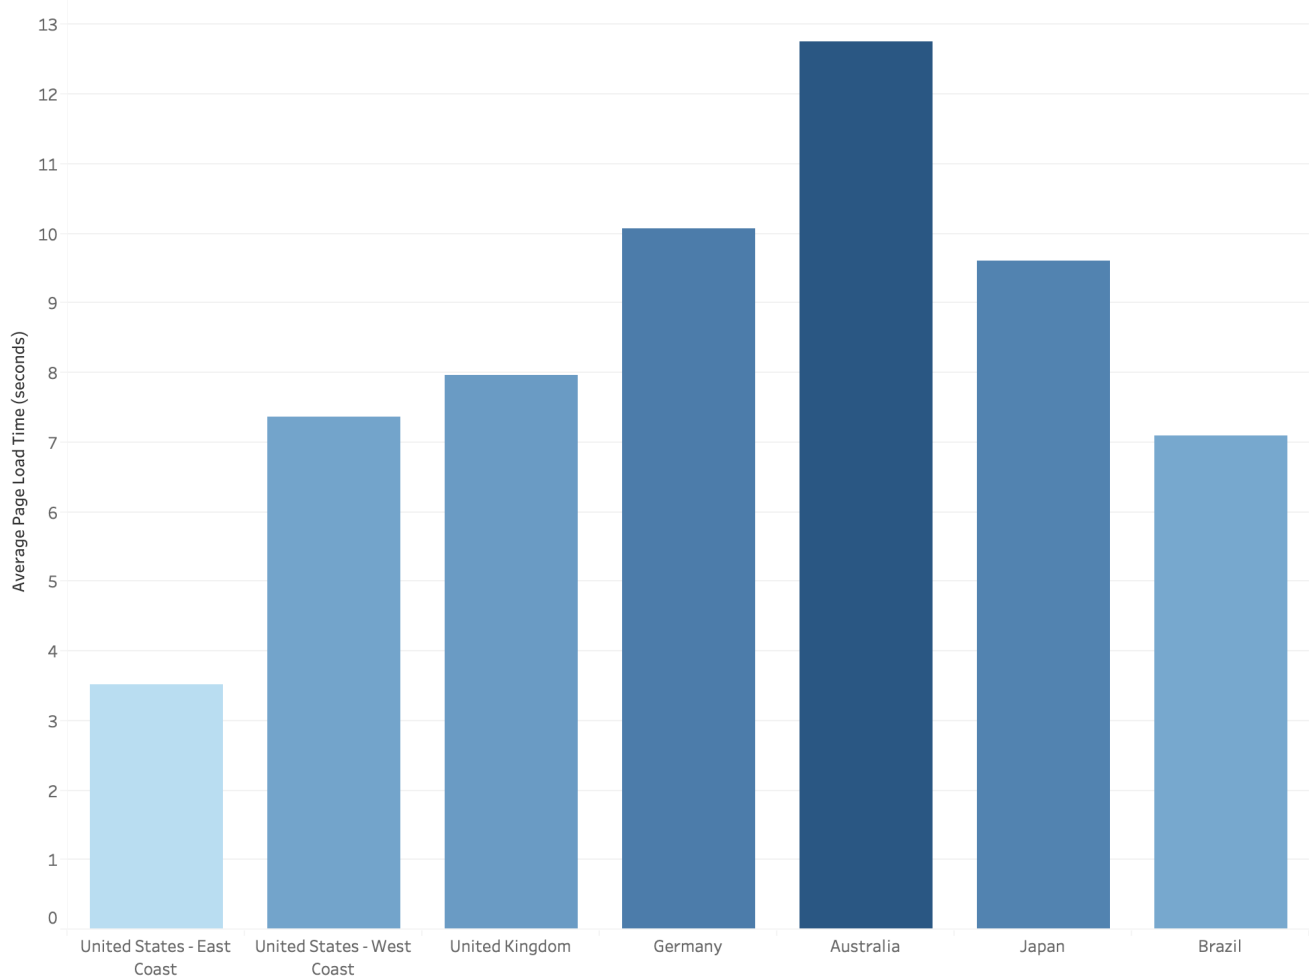

- Google Analytics
- Uptrends
- Dotcom-Tools
- Key CDN
- Pingdom Tools

Each location was measured five times and averaged for each tool, except for Google Analytics which uses a running-average.
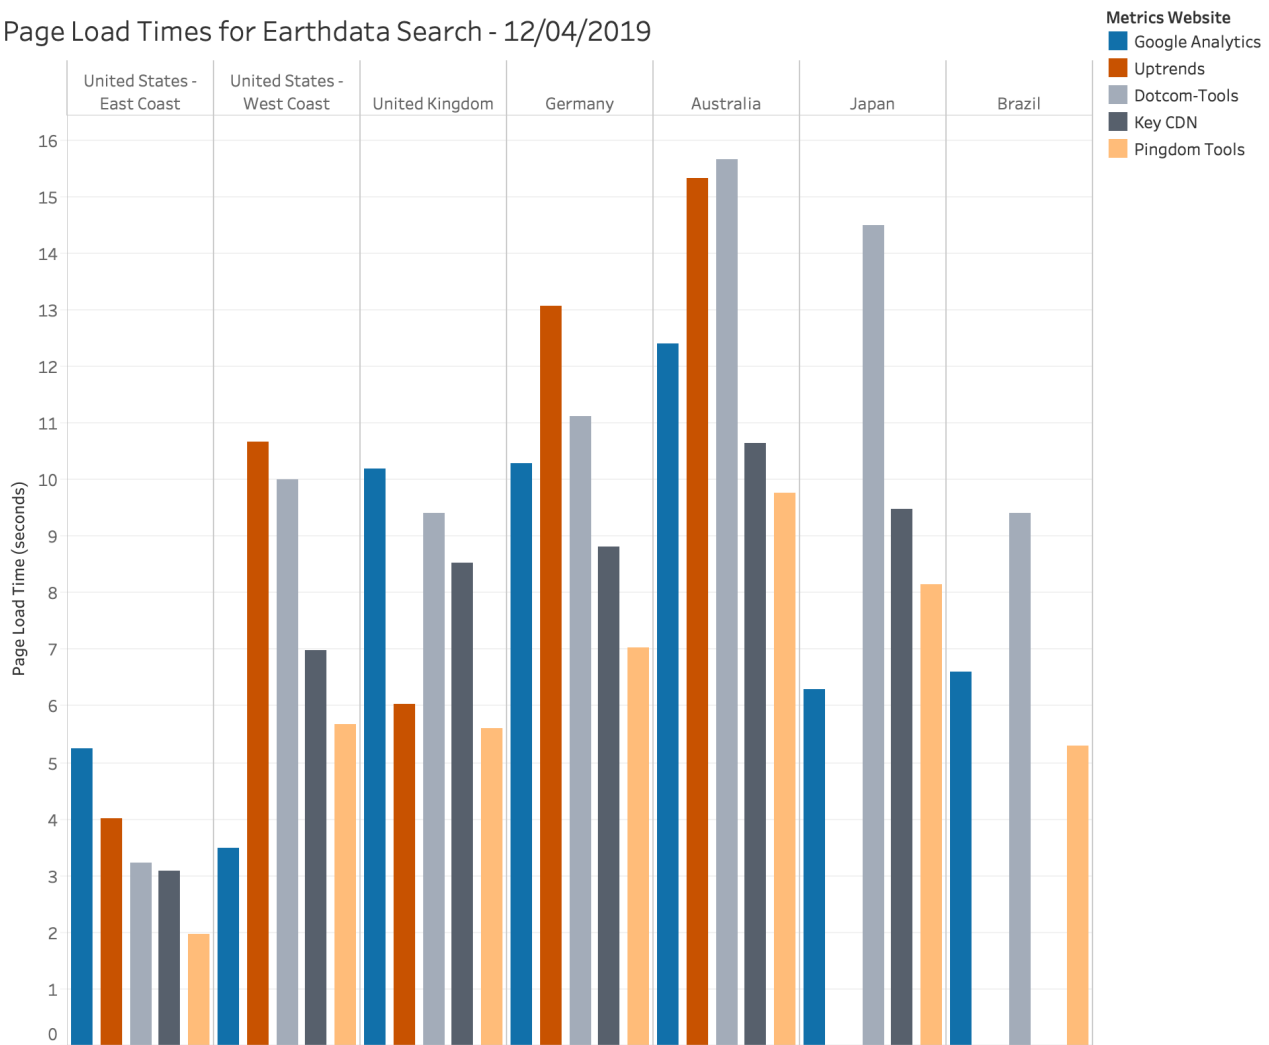

Note: These measurements were taken using a Mac laptop in Chrome (no VPN) on the East Coast of the U.S.
