

# 2020-02-26 Meeting notes

## Date

26 Feb 2020

## Attendees

- [Hyokyung Lee](#)
- [Audy Barnett](#)
- Abhijit

## Goals

- Resolve ArcGIS Server issues

## Discussion items

Time	Item	Who	Notes
5min	Portal federation	<a href="#">Hyokyung Lee</a>	<ul style="list-style-type: none"><li>• Abhijit is not familiar with system setting. He will email someone else to figure it out.</li><li>• Separate installer might be necessary to register DB to become a hosting server for Portal.</li></ul>
5min	Raster Proxy Hotfix	<a href="#">Audy Barnett</a>	<ul style="list-style-type: none"><li>• Abhijit said Raster Proxy is faster because it can cache locally. VRT requires scan all the time and makes too many calls. Performance will be bad with VRT.</li><li>• Hot fix takes 6-8 weeks due to extensive testing. Patch will go to ArcGIS Pro first and then server.</li><li>• Use ArcGIS Pro or MD tools to modify mosaic dataset directly if Raster Proxy is necessary.</li></ul>
5min	Large input table in RDS and MDCS	<a href="#">Hyokyung Lee</a>	<ul style="list-style-type: none"><li>• 1 year of mosaic dataset should be no problem. It could be Linux only issue.</li><li>• Try with ArcGIS Pro instead of MDCS script.</li><li>• Abhijit will also test to check if there's a bug in Linux.</li></ul>

## Action items
