

AGU, IN-026 - Near Real Time Data for Earth Science and Space Weather Applications

I have added session IN-026, Near Real Time Data for Earth Science and Space Weather Applications to our list of [Earth and Space Science Informatics Sessions](#)

- [Earth and Space Science Informatics Sessions](#)
 - [IN007 - Collaborative Cyberinfrastructure: Crowdsourcing of Knowledge and Discoveries](#)
 - [IN008 - Data Curation, Credibility, Preservation Implementation, and Data Rescue to Enable Multi-Disciplinary Science](#)
 - [IN010 - Data Scientists Come of Age](#)
 - [IN012 - Earth Science Mobile Apps and Other Mobile Technologies to Improve Data Generation, Access, and Usability](#)
 - [IN016 - Enabling Science Through Reuse of Data and Free and Open Source Software](#)
 - [IN026 - Near Real Time Data for Earth Science and Space Weather Applications](#)
 - [IN028 - Persistent Identifiers and Citation in Earth Science Information Infrastructure](#)
 - [IN031 - Search and Discovery of Scientific Data](#)

And a final reminder that AGU abstract deadline is tomorrow - August 6, 2013
