

New FIRMS Feature / Location Tool

FIRMS recently added a location tool to enable users to easily find and save places of interest.

Open the Location Tool by clicking on the "Location" icon from the bottom menu of [FIRMS Fire Map](#) or the [FIRMS US/Canada Fire Map](#).

- Enter the location or coordinates to search in the "Find Location" tab, checking the box to "allow multiple location selection".
- Click on the "Current Location" to find out what location you are viewing.
- Any locations you store for future visits will be saved under the "Saved Locations" tab.
