Digital Object Identifiers (DOIs) for EOSDIS

Introduction

- The ESDIS project is in the process of gathering and registering Digital Object Identifiers (DOIs) for products supported by EOSDIS. Currently only data products supported by NASA are being registered.

- The ESDIS project uses Datacite (https://citation.crosscite.org/) to register DOIs for EOSDIS earth data products. The DOIs assigned are listed by Data Provider here on the Earthdata Collaboration Environment

- This space on the Earthdata Wiki is meant to describe the ESDIS DOI process and provide guidance for registering and reserving DOIs.

ESDIS DOI Registration Process

ⓘ ESDIS and DOIs

Find the DOI assignment process and DOI policies on the ESDIS DOI Process page

ⓘ DOI Submission Process

Visit the DOI Submission Process page to access the DOI submission form and for an explanation of the various submission types

ⓘ DOI Landing Page

Guidelines and recommendations on landing page format and content can be found on the DOI Landing Page

DOI General Information

ⓘ DOI Background Information

Visit DOI Background Information to learn more about what a DOI is and how it is used.

ⓘ DOI Documents

Documentation related to DOIs is available at DOI Documents

Contact Information

✅ To submit DOIs for registration for EOSDIS supported projects, contact Nate James (nathan.l.james@nasa.gov) and Lalit Wanchoo (lalit.wanchoo-1@nasa.gov).

ESDIS DOI Status and Listing

Visit the EOSDIS DOIs Status and Listing page to view DOIs registered and reserved by ESDIS by campaign /missions; as well as current metrics.

DOI Listing by Organization

- ASDC
- ASF DAAC
- CDDIS
- ESO
- FIRMS
- GES DISC
- GHRC DAAC
- LAADS DAAC
- LANCE AMSR2
- LANCE MODIS
- LP DAAC
- LPVS
- NSIDC DAAC
- OB.DAAC
- Ozone PEATE
- PO.DAAC
- PPS
- VIIRS ATM SIPS
