

QAPercentCloudCover (ECS)

QAPercentCloudCover (ECS)

[Field Definitions are Available Here](#)

Metadata Level

Granule

Data Type

int(4)

Obligation

Optional

Description

This attribute is used to characterize the cloud cover amount of a granule. This attribute may be repeated for individual parameters within a granule. (Note - there may be more than one way to define a cloud or it's effects within a product containing several parameters; i.e. this attribute may be parameter specific)
