

# Listing All Current Tags

I wanted to see all the current tags in CMR, so I tried:

```
curl -g -i 'https://cmr.earthdata.nasa.gov/search/tags?pretty=true&tag-key=*&options[tag-key][pattern]=true'
```

But I got only 14, and they didn't include any of the tags that I saw by wild-carding 'org.\*'. Why didn't it work as I expected?
