Tasks

- 1. Find a data collection hosted at NSIDC that has map imagery and view the latest imagery over the continental US.
- 2. Find and download all MODIS Snow Cover data from days in January of this year. Subset the data to spatially to only over Boulder and download as a GeoTiff.
- 3. Find an example of MODIS Snow Cover and SMAP Radiometer soil moisture data collected within an hour of one another over Boulder.
- 4. Use the client to find and retrieve data which may be relevant to your work.
- 5. As an alternative, show us your workflow from another application (one used more frequently than Earthdata Search).
